SUMMARY

First-year Engineering Student at ENSEEIHT specializing in Digital Sciences, currently developing strong skills in software engineering, programming, and numerical tools. Deeply interested in Medical Robotics, Embedded Systems, and Signal Processing. Leveraging a solid foundation in industrial automation alongside a unique 10-year cultural and linguistic background in Tokyo, I am highly motivated to return to Japan for an engineering internship to contribute to cutting-edge robotic and embedded innovations.

TECHNICAL SKILLS

- **Programming Languages:** Python, Ada, Coq (Proof Assistant)
- **Numerical & Simulation Tools:** MATLAB
- **Tools & Operating Systems:** Linux, GitLab

WORK EXPERIENCE

Observation Internship 07/2022
Effidence Romagnat, France

- Discovered advanced automated and robotic logistics workflows by shadowing engineering teams specializing in Autonomous Mobile Robots (AMRs) for warehouse optimization.
- Analyzed navigation systems, fleet management software setups, and safety sensor protocols built to streamline high-density industrial logistics chains.

Observation Internship 02/2021
Actemium Chamalières, France

- Shadowed project managers and automation engineers to understand the lifecycle of industrial automation projects and client requirement gathering.
- Observed the optimization of supply chains through the integration of robotics, programmable logic controllers (PLCs), and automated industrial machinery.

ACADEMIC PROJECTS

TIPE – Personal Initiative Supervised Project (CPGE) 2025 – 2026
Subject: Active and Passive Analog Filtering of Audio Feedback (Larsen Effect)

- Designed and modeled analog electronic filters to detect and suppress audio feedback loops in real-time communication systems.

EDUCATION

Master of Science in Engineering (Digital Sciences) 2026 – Present
ENSEEIHT Toulouse, France

CPGE – Intensive Preparatory School for Engineering Graduate Schools 2024 – 2026
Lycée Blaise Pascal (MPSI / PSI options) Clermont-Ferrand, France

French Baccalaureate (Specialties: Mathematics and Physics) 2024
Lycée Sainte-Thècle Chamalières, France

International Elementary Schooling 2010 – 2016
Lycée Français International de Tokyo (LFIT) Tokyo, Japan

LANGUAGES & INTERESTS

- **Languages:** French (Native), English (Fluent – C1 equivalent), Spanish (B1), Japanese (10-year early childhood immersion, strong structural & cultural foundations)
- **Interests:** Competitive Basketball (Regional 1 Level), Dance (Salsa, Bachata, Rock, Kizomba), Classical & Jazz Piano (18 years of practice)
